SHREE MODAK

UNREAL ENGINE DEVELOPER

7977322694 | shreemo2005@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Unreal Engine Developer specializing in gameplay systems, UI development, and Blueprint scripting. Experienced in building single-player and multiplayer games for PC and Android using Unreal Engine. Skilled in implementing gameplay mechanics and UI systems to create smooth and engaging player experiences.

EXPERIENCE

Unreal Engine Developer
Sep 2026 – Present

LTL Productions India · Freelance · Remote

- **Secrets of the Mansion:** Sole developer of a third-person, open-world 3D horror game. Implemented story-driven objective progression, objective completion checks, and sequential objective unlocking to drive player progression.
- **Sparks:** Developed a first-person 3D mobile-world escape-game demo, structuring levels around mobile-device components and implementing multi-objective gameplay. Project represented at IGDC 2026.

Unreal Engine Developer
May 2026 – Aug 2026

Upwork · Freelance · Remote

- Developed Unreal Engine endless-runner and arcade gameplay prototypes, including Subway Surfers-style runners and SquareRace, adapting level layouts, gameplay logic, and visual themes across variants.
- Produced VR 360° video experiences, preparing immersive panoramic content for virtual-reality viewing.

Unreal Engine Developer
Aug 2025 – Nov 2025

Jabsz Studios · Internship · Maharashtra, India

- Implemented gameplay features and UMG-based UI systems using Unreal Engine Blueprints, including player-facing interfaces and weapon-related mechanics.
- Debugged Blueprint execution flow, resolved UI layout issues, and collaborated on gameplay feature integration and design documentation.

SELECTED PROJECTS

Bomber Clash · Android
LAN multiplayer action game

- Implemented game UI flows and gameplay-facing systems for a bomb-based multiplayer game, supporting match flow and player interaction.

Shadow of Aldoria · Windows
3D horror game

- Implemented inventory logic, ghost AI behaviour, and a dynamic objective system to support exploration and horror-game progression.

TECHNICAL SKILLS

Engine & Scripting: Unreal Engine 5, Blueprint Visual Scripting, basic C++ for Unreal Engine
Gameplay Programming: Gameplay mechanics, objective/state progression, AI behaviour, inventory systems, UMG, Animation Blueprints
Platforms & Media: Windows, Android, VR 360° video
Tools & Workflow: Unreal Editor, Visual Studio, Git / Version Control, Blender

EDUCATION & CERTIFICATIONS

B.Sc. Information Technology · University of Mumbai, Mumbai | 2023–2026 | 8.0 CGPA
Certifications: Unreal Engine Game Development (Udemy) · C++ for Unreal Engine (Udemy)
